Automatic Sequences is written by Jean-Paul Allouche in English language. Release on 2003-07-21, this book has 571 page count that enclose essential information with easy reading structure. The book was published by Cambridge University Press, it is one of the best computer science books that gave you everything you love about reading. You can find Automatic Sequences book with ISBN 0521823323.

Combining concepts of mathematics and computer science, this book is about the sequences of symbols that can be generated by simple models of computation called "finite automata". Suitable for graduate students or advanced undergraduates, it starts from elementary principles and develops the basic theory. The study then progresses to show how these ideas can be applied...
to solve problems in number theory and physics.

#### Formulaic Sequences

Formulaic sequences (FS) are now recognized as an essential element of language use. However, research on FS has generally been limited to a focus on description, or on the place of FS in L1 acquisition. This volume opens new directions in FS research, concentrating on how FS are acquired and processed by the mind, both in the L1 and L2. The ten original studies in the volume illustrate the L2 acquisition of FS, the relationship between L1 and L2 FS, the relationship between corpus recurrence of...

#### Notations: Diagrams and Sequences

For Bernard Tschumi, "drawing is thinking" and "being with a piece of paper and a pen does not feel like working. It can be sheer bliss", he writes, "seeing thought materialise itself in front of your eyes through the almost unconscious mediation of your hand. It is a form of notation of the mind." This collection of previously unpublished drawings, diagrams, and other remnants of the architectural process provides new insight into well-known projects like the Parc de la villette and the New Acropolis... 

#### Steenrod Squares in Spectral Sequences

This book develops a general theory of Steenrod operations in spectral sequences. It gives special attention to the change-of-rings spectral sequence for the cohomology of an extension of Hopf algebras and to the Eilenberg-Moore spectral sequence for the cohomology of classifying spaces and homotopy orbit spaces. In treating the change-of-rings spectral sequence, the book develops from scratch the necessary properties of extensions of Hopf algebras and constructs the spectral sequence in a form ...

#### The Joy of Yoga: Fifty Sequences for Your Home and Studio Practice

Millions of people take time out of their busy schedules every day to attend yoga classes where they learn postures and breathing techniques that make them feel more energized and balanced. Thousands of other people, however, have yet to find the time in their day to do anything but work, study, or chase after their children. In The Joy of Yoga, author and expert Emma Silverman teaches readers how to take advantage of the health benefits yoga offers even when they can't make it to regularly sche...

#### Algorithms on Strings, Trees and Sequences: Computer Science and Computational Biology

Traditionally an area of study in computer science, string algorithms have, in recent years, become an increasingly important part of biology, particularly genetics. This volume is a comprehensive look at computer algorithms for string processing. In addition to pure computer science, Gusfield adds extensive discussions on biological problems that are cast as string problems and on methods developed to solve them. This text emphasizes the fundamental ideas and techniques central to today's appl...

#### Average Case Analysis of Algorithms on Sequences (Wiley Series in Discrete Mathematics and Optimization)

A timely book on a topic that has witnessed a surge of interest over the last decade, owing in part to several novel applications, most notably in data compression and computational molecular biology. It describes methods employed in average case analysis of algorithms, combining both analytical and probabilistic tools in a single volume. Tools are illustrated through problems on words with applications to molecular biology, data compression, security, and pattern matching. Includes chapters on...
Introduction to Computational Biology: Maps, Sequences and Genomes (Chapman & Hall/CRC Interdisciplinary Statistics)

Biology is in the midst of a era yielding many significant discoveries and promising many more. Unique to this era is the exponential growth in the size of information-packed databases. Inspired by a pressing need to analyze that data, Introduction to Computational Biology explores a new area of expertise that emerged from this fertile field- the combination of biological and information sciences. This introduction describes the mathematical structure of biological data, especially from sequence...

Flexible Pattern Matching in Strings: Practical On-Line Search Algorithms for Texts and Biological Sequences

Recent years have witnessed a dramatic increase of interest in sophisticated string matching problems, especially in information retrieval and computational biology. This book presents a practical approach to string matching problems, focusing on the algorithms and implementations that perform best in practice. It covers searching for simple, multiple and extended strings, as well as regular expressions, and exact and approximate searching. It includes all the most significant new developments...
