Designing the iPhone User Experience: A User-Centered Approach to Sketching and Prototyping iPhone Apps
Given the fiercely competitive state of the iPhone app landscape, it has become increasingly challenging for app designers and developers to differentiate their apps. The days are long gone when it was possible to crank out an app over the weekend and refine it after receiving a few not so flattering user reviews. Users now have choices -- lots of them. If your app is difficult to use or doesn't meet their needs, finding another one is just a tap away. To illustrate, consider the ever-growing f...
Designing Multi-Device Experiences: An Ecosystem Approach to User Experiences across Devices

Welcome to our multi-device world, a world where a user's experience with one application can span many devices—a smartphone, a tablet, a computer, the TV, and beyond. This practical book demonstrates the variety of ways devices relate to each other, combining to create powerful ensembles that deliver superior, integrated experiences to your users. Learn a practical framework for designing multi-device experiences, based on the 3Cs—Consistent, Complementary, and Continuous approaches. Graduate from of...

User-centered Computer Aided Language Learning

"This book discusses the basis of a broad framework for the development and management of Computer Aided Language Learning (CALL) environments, covering domains as diverse as education, information systems, psychology, sociology, linguistics, artificial intelligence and e-learning."—Provided by publisher.

Situation Awareness with Systems of Systems

This book discusses various aspects, challenges, and solutions for developing systems-of-systems for situation awareness, using applications in the domain of maritime safety and security. Topics include advanced, multi-objective visualization methods for situation awareness, stochastic outlier selection, rule-based anomaly detection, an ontology-based event model for semantic reasoning, new methods for semi-automatic generation of adapters bridging communication gaps, security policies for syste...

User-Centered Interaction Design Patterns for Interactive Digital Television Applications

Technology is meant to make life easier and to raise its quality. Our interaction with technology should be designed according to human needs instead of us being required to adapt to technology. Even so, technology may change quickly and people and their habits change slowly. With the aim of supporting user acceptance of iTV, the focus of this book is on the usability of iTV applications. A method for developing interaction design patterns especially for new technologies is presented for the fir...

Designing for the Digital Age: How to Create Human-Centered Products and Services

Whether you're designing consumer electronics, medical devices, enterprise Web apps, or new ways to check out at the supermarket, today's digitally-enabled products and services provide both great opportunities to deliver compelling user experiences and great risks of driving your customers crazy with complicated, confusing technology. Designing successful products and services in the digital age requires a multi-disciplinary team with expertise in interaction design, visual design, industrial d...
