Conceptual Structure in Childhood and Adolescence

Christine Howe addresses both psychological and educational concerns by looking in detail at three areas of physics: heat transfer, propelled motion and object flotation. She draws on her own empirical work in this area as well as that of others to build a new model of conceptual growth. Her results are surprising, in some cases supporting work by Piaget and Vygotsky, but in others contradicting them. Conceptual Structure in Childhood and Adolescence will be of interest to developmental psycholo...
