Image Processing Using Pulse-Coupled Neural Networks: Applications in Python (Biological And Medical Physics, Biomedical Engineering) is written by Thomas Lindblad in English language. Release on 2013-05-29, this book has 238 page count that attach useful information with easy reading experience. The book was publish by Springer, it is one of best computer science book genre that gave you everything love about reading. You can find Image Processing Using Pulse-Coupled Neural Networks: Applications in Python (Biological And Medical Physics, Biomedical Engineering) book with ISBN 364236876X.
Image processing algorithms based on the mammalian visual cortex are powerful tools for extracting information and manipulating images. This book reviews the neural theory and translates them into digital models. Applications are given in areas of image recognition, foveation, image fusion, and information extraction. The third edition reflects renewed international interest in pulse image processing with updated sections presenting several newly developed applications. This edition also introduces a suite of Python scripts that assist readers in replicating results presented in the text and to further develop their own applications.

Image Processing Pulse Coupled Neural Networks Related Books

Speech, Audio, Image and Biomedical Signal Processing Using Neural Networks
Humans are remarkable in processing speech, audio, image, and some biomedical signals. Artificial neural networks are proved to be successful in performing several cognitive, industrial, and scientific tasks. This peer reviewed book presents some recent advances and surveys on the applications of artificial neural networks in the areas of speech, audio, image, and biomedical signal processing. It consists of 18 chapters prepared by some reputed researchers and practitioners around the globe.

Hierarchical Neural Networks for Image Interpretation (Lecture Notes in Computer Science)
Human performance in visual perception by far exceeds the performance of contemporary computer vision systems. While humans are able to perceive their environment almost instantly and reliably under a wide range of conditions, computer vision systems work well only under controlled conditions in limited domains. This book sets out to reproduce the robustness and speed of human perception by proposing a hierarchical neural network architecture for iterative image interpretation. The proposed archi...

Image Acquisition and Processing with LabVIEW (Image Processing Series)
Image Acquisition and Processing With LabVIEW combines the general theory of image acquisition and processing, the underpinnings of LabVIEW and the NI Vision toolkit, examples of their applications, and real-world case studies in a clear, systematic, and richly illustrated presentation. Designed for LabVIEW programmers, it fills a significant gap in the technical literature by providing a general training manual for those new to National Instruments (NI) Vision application development and a refe...

Biosignal and Medical Image Processing, Second Edition (Signal Processing and Communications)
A Practical Guide to Signal Processing Methodology Just as a cardiologist can benefit from an oscilloscope-type display of the ECG without a deep understanding of electronics, an engineer can benefit from advanced signal processing tools without always understanding the details of the underlying mathematics. Through the use of extensive MATLAB examples and problems, Biosignal and Medical Image Processing, Second Edition provides readers with the necessary knowledge to successfully evaluate and ...
Neural Networks

Neural networks are a computing paradigm that is finding increasing attention among computer scientists. In this book, theoretical laws and models previously scattered in the literature are brought together into a general theory of artificial neural nets. Always with a view to biology and starting with the simplest nets, it is shown how the properties of models change when more general computing elements and net topologies are introduced. Each chapter contains examples, numerous illustrations, a...

Neural Information Processing

The two volume set LNCS 4984 and LNCS 4985 constitutes the thoroughly refereed post-conference proceedings of the 14th International Conference on Neural Information Processing, ICONIP 2007, held in Kitakyushu, Japan, in November 2007, jointly with BRAINIT 2007, the 4th International Conference on Brain-Inspired Information Technology. The 228 revised full papers presented were carefully reviewed and selected from numerous ordinary paper submissions and 15 special organized sessions. The 116 pap...

Mathematics of Neural Networks

This volume of research papers comprises the proceedings of the first International Conference on Mathematics of Neural Networks and Applications (MANNA), which was held at Lady Margaret Hall, Oxford from July 3rd to 7th, 1995 and attended by 116 people. The meeting was strongly supported and, in addition to a stimulating academic programme, it featured a delightful venue, excellent food and accommodation, a full social programme and fine weather - all of which made for a very enjoyable week. T...

Advances in Neural Networks

The two volume set LNCS 3173/3174 constitutes the refereed proceedings of the International Symposium on Neural Networks, ISNN 2004, held in Dalian, China in August 2004. The 329 papers presented were carefully reviewed and selected from more than 800 submissions. The papers span the entire scope of neural computing and its applications; they are organized in 11 major topical parts on theoretical analysis; learning and optimization; support vector machines; blind source separation, independent c...
