Provides detailed information about the signal transduction pathways used by interferons to activate gene transcription. In addition, this book discusses how the same pathways are used by many other cytokines and thus provide a forum for cross-talk among these important biological response modifiers. Additionally, the book introduces the interferon system and describes the interferon-inducible genes whose products are responsible for the cellular actions of interferons. The nature of the interferon receptors and how the transcriptional signals are transmitted from the receptors on the cell surface to the genes in the nucleus are discussed in detail. Finally, the use of similar pathways of signal transduction by other cytokines is highlighted.

Practice and Theory of Automated Timetabling IV
This volume contains a selection of papers from the 4th International Conference on the Practice and Theory of Automated Timetabling (PATAT 2002) held in Gent, August 21-23, 2002. Since the 1st conference in Edinburgh in 1995, the range of timetabling applications at the conferences has become broader and more diverse. In the selected papers volume from the 1995 conference, there were just two contributions (out of 22) which did not specifically address school and university timetabling. In the selected pa...

Database Design and Relational Theory: Normal Forms and All That Jazz (Theory in Practice)
What makes this book different from others on database design? Many resources on design practice do little to explain the underlying theory, and books on design theory are aimed primarily at theoreticians. In this book, renowned expert Chris Date bridges the gap by introducing design theory in ways practitioners can understand when lessons learned over four decades of experience to demonstrate why proper database design is so critical in the first place. Every chapter includes a set of exerc...

Theory-Based Treatment Planning for Marriage and Family Therapists: Integrating Theory and Practice
This text is a treatment planner and theory guide for therapists working from systemic and postmodern approaches. Unlike existing resources, this treatment planner provides a means to directly integrate family therapy theory and practice. By providing treatment planning strategies along with complete overviews of specific theories, the book provides a remedy for the common "missing link" between theory and practice. The purpose of this book is to fill the ever-widening gap between formal trainin...

The Practice of Theory

Many art historians regard poststructuralist theory with suspicion; some even see its focus on the political dimension of language as hostile to an authentic study of the past. Keith Moxey bridges the gap between historical and theoretical approaches with the provocative argument that we cannot have one without the other. "If art history is to take part in the processes of cultural transformation that characterize our society," he writes, "then its historical narratives must come to terms with t...
