The Project Team Builder (PTB) meets the need for an effective teaching and training tool of project management. The software
introduces the user to the full dynamics of project planning, monitoring and control, moving scenario-wise from the easy,
fundamental issues to the more involved, complex ones. Based on a sound conceptual foundation, it provides the ideal
individual and team training support for bringing projects to completion effectively and efficiently in a dynamic stochastic
environment. Highly recommended Willy Herroelen, Emeritus Professor of Operations Management, Katholieke Universiteit
LeuvenThe Engineering Project Management School of the Israeli Electric Company (IEC) used the Project Team Builder
simulator developed at the Technion. Using PTB, it was possible to practice risk management when uncertainty is presented in
resources availability, duration of activities and cash flow. The challenges presented to the students increased motivation. The
quality of the learning process, as well as the end results, was excellent. Sergio Klik, Director, Engineering Project Management
School, The Israeli Electric Company PTB takes an important step in the right direction. It employs simulation in order to put
the student in the real situation where he has to plan and execute projects by handling all issues at once. In particular, it puts the
student in a situation where his project is exposed to risk. By this, the student has to combine the isolated and simplified views
on projects, and he learns that risk can materialize and that he has to plan and execute the project accordingly. This is a very
important aspect of project management which is learnt by doing (and failing) and which has not been delivered this way before.
Rainer Kolisch, Professor of Operations Management, TUM School of Management, Technische UniversitÄ t MnchenA video
tutorial of the Project Team Builder (PTB) simulator is available at the following link: http://www.sandboxmodel.com/videos-1The
tutorial presents the PTB version that comes with the book and demonstrates the use of PTB for training and for teaching.

Case Studies in Project, Program, and Organizational Project Management

The ever expanding market need for information on how to apply project management principles and the PMBOK contents to day-to-day business situations has been met by our case studies book by Harold Kerzner. That book was a spin-off from and ancillary to his best selling text but has gained a life of its own beyond adopters of that textbook. All indications are that the market is hungry for more cases while our own need to expand the content we control, both in-print and online would benefit from...
